

Recreation Window And Door
Bringing The Outside In

FRONT DOORS

Wood doors have a rich sense of character and beauty all their own. Perhaps this can be attributed to their natural wood grain, their often stained (rather than painted) appearance and the heavy, durable feel they tend to have. What's more, they can be a stunning way to make a statement at your front entry and also give guests an idea of what awaits in your home's interior spaces.

Solid wood timber front door section details

Recreation Window And Door

panel
Not glued or fastened to the frame, so it can expand and contract.

core

Hinge Options

We offer two hinge types: Butt Hinge and Concealed Hinge. They are available in different sizes, materials and finishes to match or complement other hardware for your door.

Concealed Hinge

Three-Dimensional Adjustability

Locks & Handles

Deadbolt Lock

Deadbolt locks are often accompanied with pull handles on both sides. Roller catches are utilized to keep the door from opening while not locked.

Tubular & Mortise Lock

These two-point lock options offer a large selection of decorative handles to choose from.

Multipoint Lock

Multipoint locks provide additional strength and security through several locking points. Three-point and five-points locks available, key or lever-activated.

Wrought iron door details

The Benefits of Screens

The screens go in between door design and operable glass, acting as a barrier to keep bugs out of the house and let fresh air in. It is built with a one-piece magnetic iron frame that attaches to the door frame.

The Benefit of Operable Glass

Our standard iron entry doors are equipped with interior glass panels that open independently from the doors. You can open the window of the door and air will come through.

Wrought iron door details

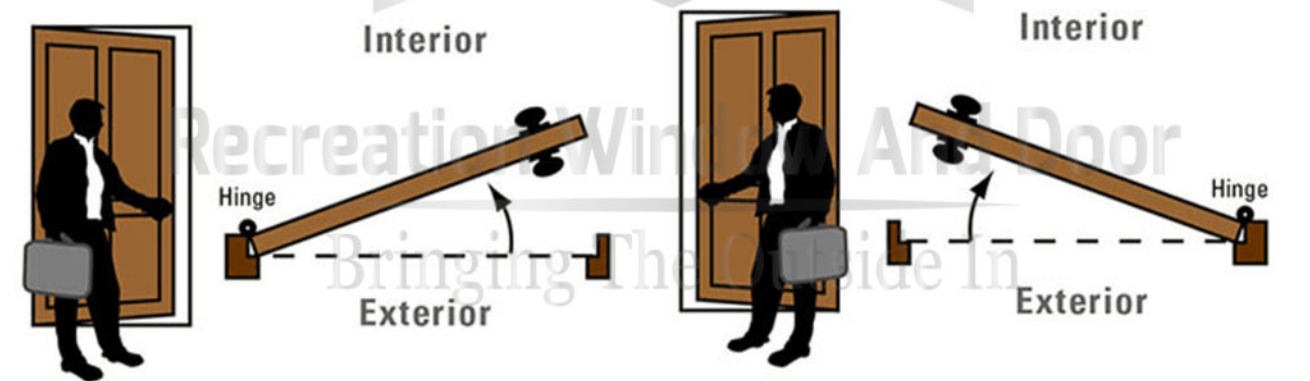

Left Hand Outswing

If you are standing at the door to a building, you PULL the door to enter and the hinges are on the left hand side, then the door is LEFT-HANDED OUTSWING.

Right Hand Outswing

If you are standing at the door to a building, you PULL the door to enter and the hinges are on the right hand side, then the door is RIGHT-HANDED OUTSWING.

Left Hand Inswing

If you are standing outside of the building, you PUSH the door to enter the house and the hinges are located on the left hand side, then the door is LEFT-HANDED INSWING.

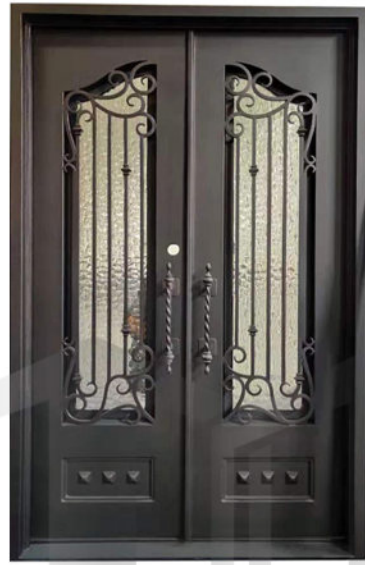

Right Hand Inswing

If you are standing outside of a building, you PUSH the door to enter the house and the hinges are located on the right-hand side, then the door is RIGHT-HANDED INSWING.
